

Problem

Problem

RefineableFishPoissonProblem< ELEMENT >

```
graph BT; A[RefineableFishPoissonProblem< ELEMENT >] --> B[Problem]; A --> C[Problem];
```

The diagram illustrates a class hierarchy. At the bottom, a box labeled 'RefineableFishPoissonProblem< ELEMENT >' has two arrows pointing upwards to two separate boxes, both labeled 'Problem'. This indicates that 'RefineableFishPoissonProblem' is a base class or a more specific implementation that inherits from or specializes the 'Problem' interface or base class.
