

SolidTElement< 1, 3 >

```
graph BT; A[oomph::FaceGeometry< MyTaylorHoodElement >] --> B[SolidTElement< 1, 3 >];
```

A diagram showing a relationship between two classes. A solid rectangular box at the bottom contains the text 'oomph::FaceGeometry< MyTaylorHoodElement >'. A vertical arrow points upwards from the center of the top edge of this box to a dashed horizontal line. Above this dashed line, centered, is the text 'SolidTElement< 1, 3 >'. The dashed line appears to be the bottom boundary of a larger container for the top text.

oomph::FaceGeometry< MyTaylorHoodElement >
