

oomph::ErrorEstimator

oomph::Z2ErrorEstimator

```
graph BT; Z2[oomph::Z2ErrorEstimator] --> Error[oomph::ErrorEstimator];
```

The diagram illustrates an inheritance relationship between two classes. At the bottom, the class `oomph::Z2ErrorEstimator` is shown within a solid rectangular box. A vertical arrow points upwards from the center of this box to the lower dashed boundary of a container above. This container holds the class `oomph::ErrorEstimator`, which is positioned between two horizontal dashed lines. This visual arrangement signifies that `oomph::Z2ErrorEstimator` inherits from `oomph::ErrorEstimator`.
